# Our Elementary class / la classe 6-12: The child's development stage 6-12

## Elementary Class: Age 6 - 12

In the elementary class, children continue to learn individually and in groups. Long blocks of time encourage extended spans of concentration, uninterrupted by bells indicating a sudden change of subject.

The children learn to set goals, manage time, organize projects and use a variety of resources. This program gives children basic learning skills, confidence, self-esteem, an appreciation of other cultures, and peaceful techniques for conflict resolution.

“The class room is never big enough”

.... and much more!  
.... et beaucoup plus !

“The child's development follows a path of successive stages of independence, and our knowledge of this must guide us in our behaviour towards him. We have to help the child to act, will and think for himself. This is the art of serving the spirit, an art which can be practised to perfection only when working among children.”
